

Manual test plan for Cider

Start the frontend and visit <http://localhost:3000/>

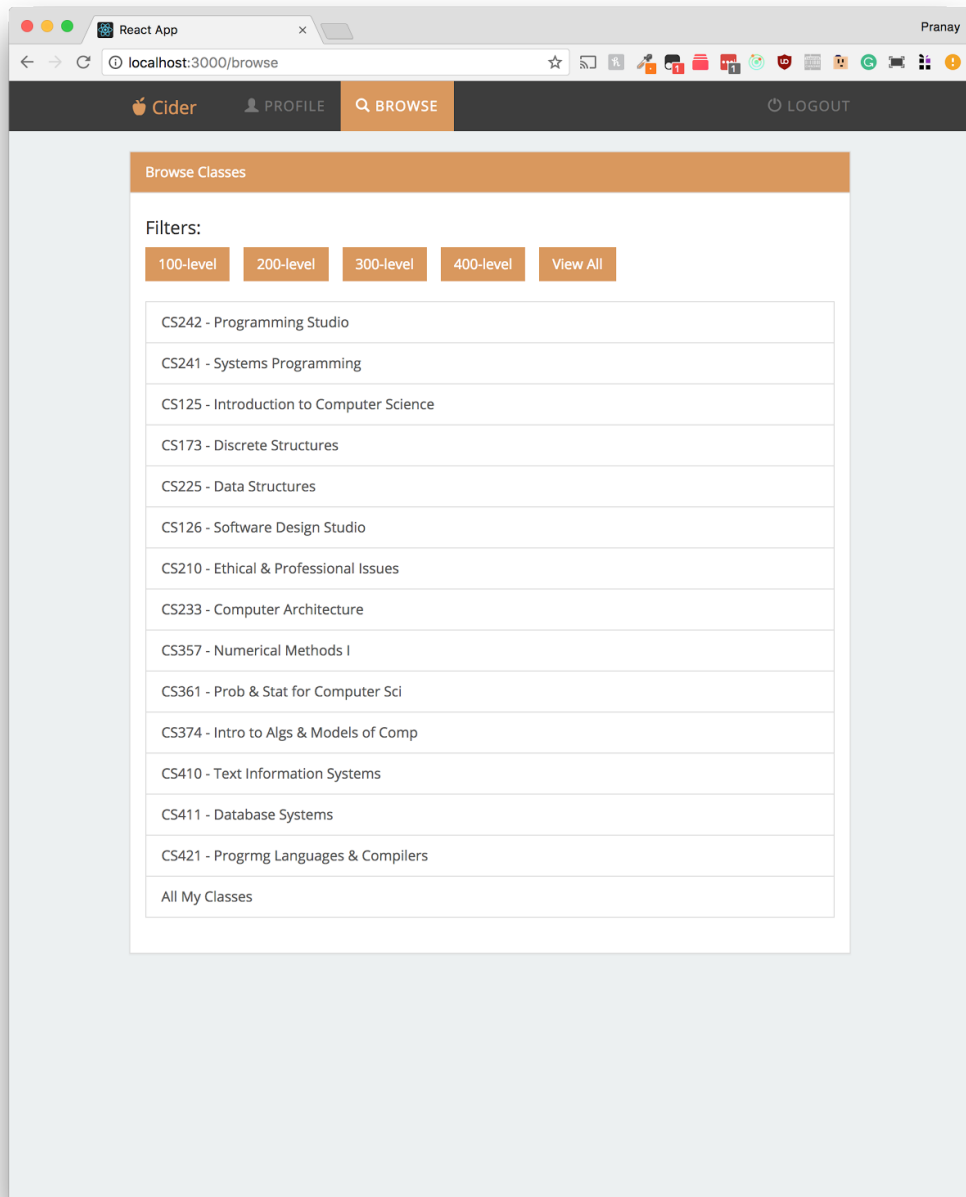

From last week's test plan, following through to this week: log back in and go to your profile page

You should see our shiny new design

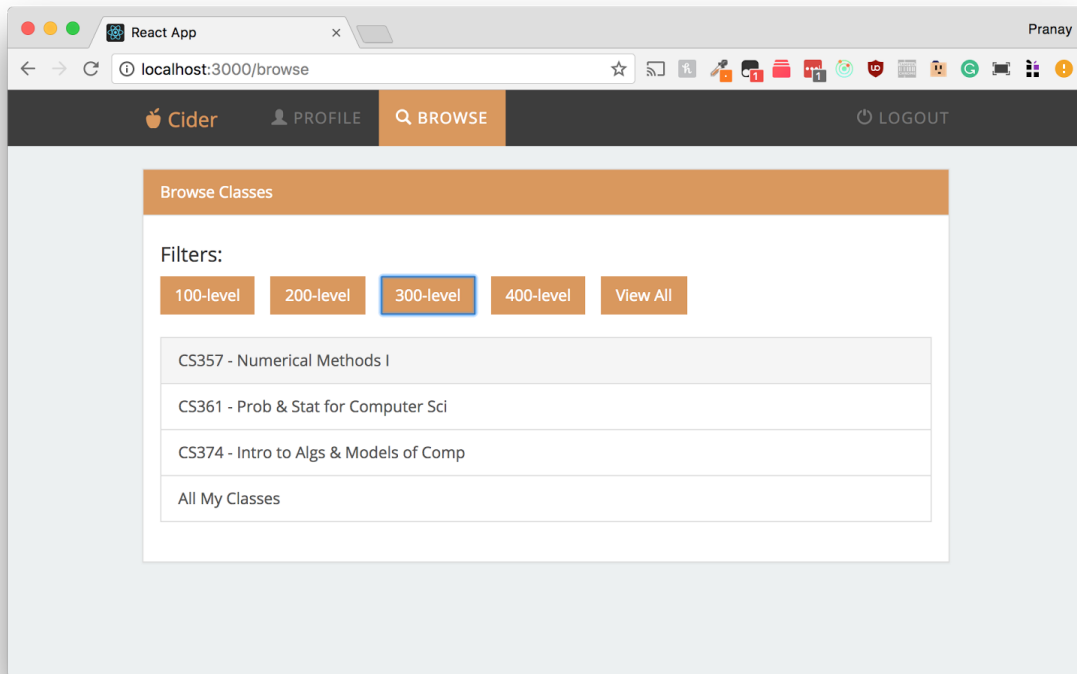

Try repeating functionality from last week (adding/removing classes)

Then, move on to the Browse Page

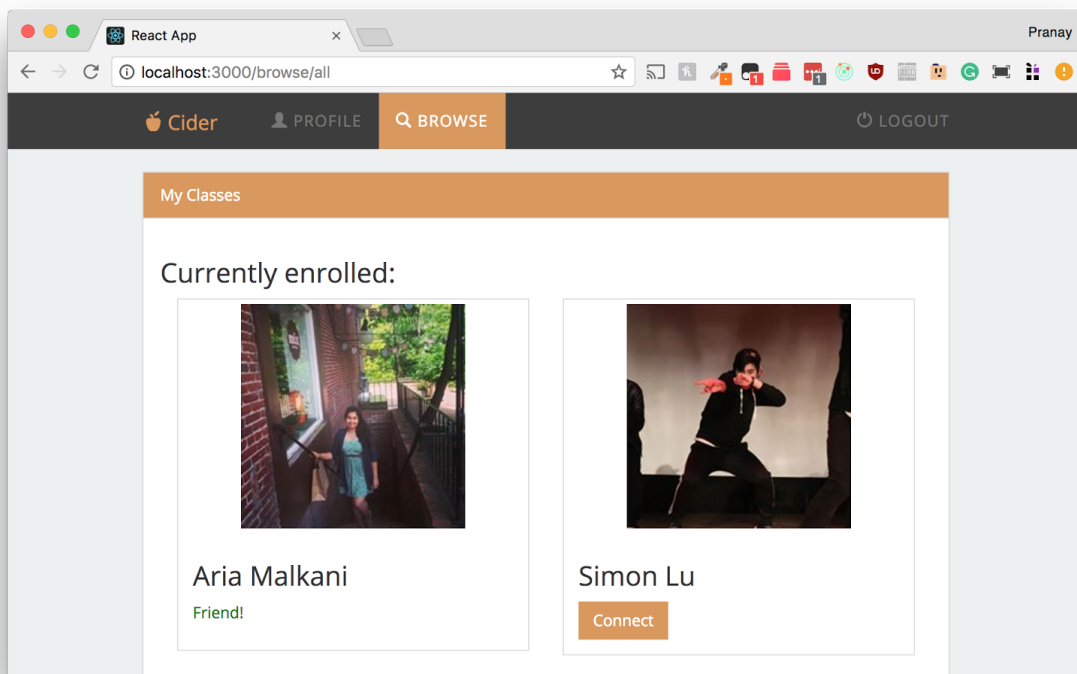

You'll see a few more classes, and the filter button at the top. Try toggling between the filter buttons. You should see filtered outputs for the class list :)

Filtered Output for 200 level courses

Go back to “View All” and click “All My Classes” (The very last option at the bottom which wasn’t there last week)

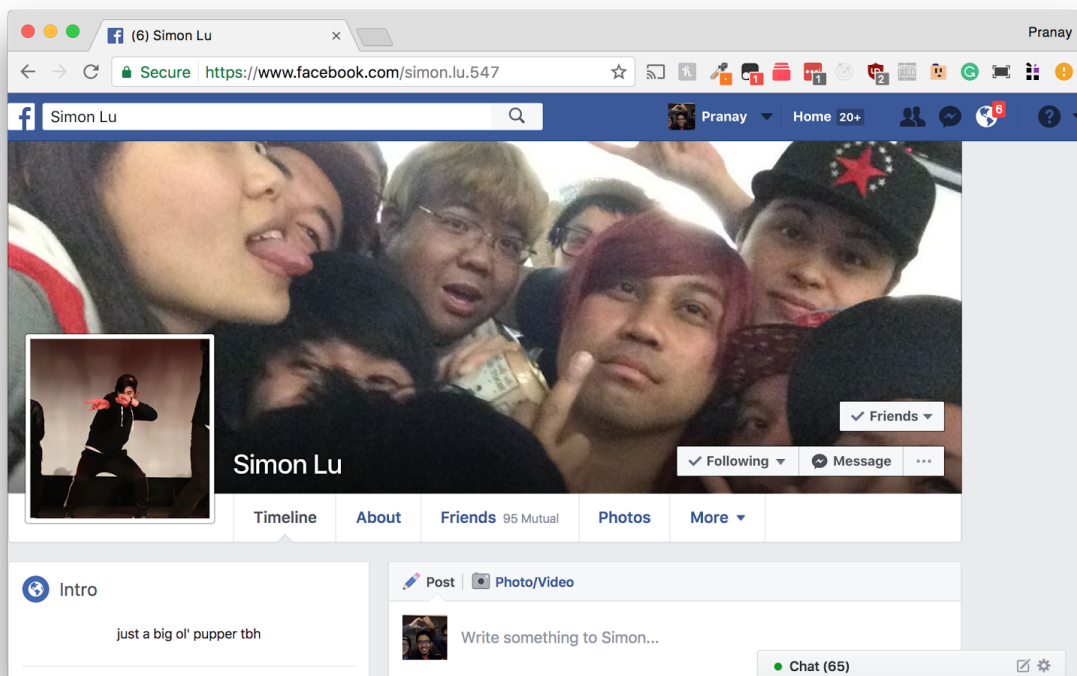

You'll see a list of all the students in all the classes you're currently enrolled in :)

Ooh, what's that, the new "Connect" button and "Friend!" label?

Cider should now tag all your Facebook Friends as "Friend" and people who aren't your friends yet with a button that says "Connect"

Ensure that all your facebook friends say "Friend" on this page. Then, go ahead and try to connect with someone new! It should take you to their Facebook Profile

And that, my friends, is cider!

Thanks for the awesome semester

Good luck on finals :D
